*To ensure that you have the most recent version of the Electric Vehicles Manual:
www.redcatracing.com/manuals/ELECTRIC-MANUAL.pdf
AGE WARNING!
This radio controlled (RC) vehicle is not a toy! You must be 14 years of age or older to operate this vehicle. Adult supervision is required.

RISK OF RUNAWAY VEHICLE OR INJURY!
Never turn on the vehicle or plug in the battery pack without first having the controller turned on.

RISK OF FIRE! / RISK OF EXPLOSION!
There is a risk of fire and explosion when dealing with batteries. Rechargeable batteries may become hot and catch fire if left unattended or charged too quickly. Use extra caution when charging LiPO batteries. Use only LiPO specific chargers. Use a LiPO safe charging pouch when charging LiPOs. Charge away from flammable materials. Never charge at a rate higher than 1C. (2000Mah pack= 2amps charge rate). Overcharging can lead to fire and explosion. Always store battery packs in a cool dry place.

RISK OF BURNS!
The batteries, electronic speed controller (ESC), electric motor, and other areas of the vehicle can get hot. Burns can occur if touched after vehicle operation. Allow adequate time to cool before handling.

RISK OF ELECTRICAL SHOCK!
Use caution when charging batteries. Do not touch positive and negative leads together. Do not lay battery on metal. Use only chargers specified for the battery type being charged. Keep batteries and chargers away from water.

RISK OF INJURY!
Hobby grade RC vehicles can cause serious injury or death if not operated correctly. Never use vehicle in crowds. Never chase people or animals. Drive in safe open areas only. Keep body parts away from moving parts.

RISK OF DAMAGE!
Never operate RC vehicles on public roads. Damage of vehicle and property can occur. Only operate on open private property. Never charge the battery pack while it is still plugged into the RC vehicle. Always unplug the battery pack from the electronic speed controller (ESC) and remove the battery from the RC vehicle before charging. Failure to do so will result in damage to the vehicle’s electronics.

WARNING!
Do not mix old and new batteries. Do not mix alkaline, lithium, standard (carbon zinc), or rechargeable (nickel cadmium) batteries. Do not change or charge batteries in a hazardous location.

FCC Compliance Statement! The radio included with your vehicle complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operations. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

WARNING: While operating the Radio, a separation distance of at least 20 centimeters must be maintained between the radiating antenna and the body of the user or nearby persons in order to meet the FCC RF exposure guidelines.
FEATURES & SPECIFICATIONS

- Electric Brushed 390 Motor
- Brushed Splash Proof ESC/RX
- Forward and Reverse
- 4 Wheel Drive
- Coil Over Shocks
- 7.4v (2x Li-ion 3.7v Batteries) w/ Charger
- 2.4GHz Radio System
- Scale: 1/12
- Length: 371mm
- Width: 285mm
- Height: 130mm
- Wheelbase: 240mm
- Ground Clearance: 45mm
- Gear Ratio: 12.4:1

VEHICLE OVERVIEW

A: On/Off Switch
B: ESC/Receiver (2-in-1)
C: Motor
D: Steering Servo
E: Steering Linkage
F: Battery Compartment (x2)
G: Coil Over Shocks (x4)
Steering Trim: Left knob. Used to set the steering neutral point. If the vehicle veers in one direction while the steering wheel is centered, turn this knob in the opposite direction until the vehicle drives straight.

Throttle Trim: Right knob. Used to set the throttle neutral point. If the vehicle moves forward or reverse while the throttle trigger is centered, turn this knob until the vehicle remains still.

Steering Reverse Switch: Center switch. Used to change steering orientation. If the car turns right when you steer left, flip this switch.

Power LED: When the transmitter is switched on, the Power LED flashes quickly while it is locating the receiver. The Power LED is also a battery level indicator. When the transmitter and vehicle are both turned on, the LED will light up solid if the batteries are full. If the LED flashes slowly, turn off both the vehicle and transmitter, and replace the transmitter batteries.

Auxiliary: Not used for this model.

Transmitter Batteries: Uses 2x AA batteries.

1. Remove the battery door as shown in the image.
2. Install two new AA batteries. Be sure to line up (+) positive and (-) negative polarities of the batteries with the (+) positive and (-) negative marks on the transmitter battery door.
3. Slide battery door back into place.

WARNING!
Do not mix old and new batteries. Do not mix alkaline, lithium, standard (carbon zinc), or rechargeable (nickel cadmium) batteries. Do not change or charge batteries in a hazardous location.

CHARGING VEHICLE BATTERIES

1. Remove the battery compartment doors (A) and remove the batteries (B) from the vehicle.
2. Plug the two parts of the charger together (C) and insert the batteries into the charge doc (D). Make sure the (+)(-) polarities are lined up correctly. Now plug the charger plug into a 110v wall receptacle. The two Li-ion batteries will take about 3hrs to charge.

LED Status: The GREEN LED will light when the charger is plugged into a 110v wall receptacle. Both RED and GREEN LEDs will light while the batteries are charging. The RED LED will go out when the batteries are fully charged.
BATTERY WARNINGS

- Never leave batteries unattended while charging.
- Remove batteries from the charger and unplug the charger once the batteries have completed charging.
- Batteries will get warm, but should never get hot. If batteries get hot while charging, immediately unplug the charger and take it, with batteries, outside to a safe area away from anything that may catch fire. Do not place in direct sunlight, rain, or water.
- Always check the polarity (+/-) of the batteries, in the transmitter, vehicle, and charger. If battery polarity is reversed, fire and/or damage may occur.
- Do not mix old and new batteries. Do not mix alkaline, lithium, standard (carbon zinc), or rechargeable (nickel cadmium) batteries. Do not change or charge batteries in a hazardous location.
- Do not store batteries in a hot place. Keep out of direct sunlight for extended periods.
- Remove batteries from the transmitter and vehicle when not in use. Store batteries in a safe, dry, and cool place.

RUNNING THE VEHICLE

1. Be sure to have new AA batteries in the transmitter and freshly charged Li-ion batteries (included) in the vehicle.
2. Turn on the transmitter first (E).
3. With the transmitter turned on, you may now turn on the vehicle (F).

To turn the vehicle on: Always be sure to turn on the transmitter 1st, and the vehicle 2nd.
To turn the vehicle off: Always be sure to turn off the vehicle 1st, and the transmitter 2nd.

STEERING WHEEL

| CENTER | Wheels remain centered. |
| LEFT | Wheels steer to the left. |
| RIGHT | Wheels steer to the right. |

TRIGGER

| CENTER | Truck remains still. |
| PULL | Truck drives forward. |
| PUSH | 1st push = Brakes. 2nd push = Reverse. |
**EXPLODED VIEWS**

Wing Installation

Tire / Wheel Installation

Tire installation is the same for front and rear.
